

TRAFFIC SIGNAL RENTAL BID

Q&A No. 1

- Q: On the traffic signal rental (EACH) how does the rental process work? We as a company rent out in sets but will quote it as each unit as your bid asks. Is it as you need them? Is there a start and end date ahead of time? Is there a timeframe to get units to your location upon request? Will delivery be to your location every time or various jobsites? Will demonstration (set up) needed every time rented or just one time in the beginning? Will you be needing vehicles detectors on the units (plug and play option) or just a phase time signal?
- A: We rent a set of 2 monthly. It is as we need them for emergency purposes. The area we are currently looking at will be for approximately 4-6 months beginning April 1. Same location for delivery. Demonstration needed once. Yes, units have to be plug and play with vehicle detectors.
