It has come to my attention that the Colangelo family has subdivided some lands near Natalie and Jacob Road. We are Cortlandt and Yorktown meet near Paris high school and they want to take this little ship of land of 23 acres cut down all the trees some of the mountain to make 25 acres of a solar array I live in the area. My husband and I are 100%. This is gonna be noise and trucks and it will kill the land of all the animals that live in the over here I mean, we have you name it we have it we have bobcats and coyotes and deer and and then when you disrupt it, they come Out and then it's cause I have a dog and I've had a giant coyote come up to me and somebody saved my life because he was about to suck me a few years ago so cutting down animals come out and about so we hope you as you are reconsidering. I hope you continue reconsidered putting that into this very quiet residential neighborhood that people don't want to look at that. They want to see the mountains and the trees and why they bought this property and then everyone's property value will go down if you put this in , so thank you for your time

Marlene and Rafael Lopez
